## Nano Brief

Season's  
Greetings

### 2019 New Year's Resolutions

 Visit Ebatco's new facility

 Meet Ebatco staff at a tradeshow

 Call Ebatco to discuss a new project

 Send samples to Ebatco

 Receive the best wishes from Ebatco

Happy New Year!

*Dear Customers and Friends,*

*It is that time of the year again. 2018 will be over soon and 2019 will be here before we know it. At this very important time of the year, we would like to express our sincere gratitude to you for your great support, understanding, encouragement, collaboration and business in 2018.*

*In a quick summary, the 11<sup>th</sup> year for Ebatco has been filled with many exciting and significant events. In March, we moved into a more modern and accommodating facility, doubling the lab space. The move and instrument-qualification were not easy, but were accomplished relatively smoothly and swiftly, thanks to the extraordinary efforts of our team. After the move, Dr. Rebecca Tissot's onboarding and the commissioning of a Rigaku Smart Lab X-ray Diffractometer have broadened our services to include material characterization and unknown material identification using X-rays. Further, the newly added macroscratch tester, the Revetest from Anton Paar, has expanded our scratch testing of thin films and coatings from nano and micro scales to macro scale.*

*Looking into 2019, we are more confident and prepared to serve you with unparalleled lab services in material and device testing, failure analysis, unknown and contamination identification, etc. Please feel free to call on us whenever you have unmet analytical needs or unsolved material challenges.*

*We wish you, your family and your company a lucky and prosperous year of 2019!*

*Yours truly,*

*Dehua Yang, Ph. D., FASM  
President*
